CLEANING AND MAINTENANCE	All products are made of solid brass or solid brass and copper. As an alloy, they will not rust or rot. However, an un-lacquered polished natural brass finish, will patina and mellow in colour and we feel this improves the look of our products. Lanterns in un-lacquered finishes, will need regular polishing, in order to retain a new shine if required. We can make fittings look older than they are, using Distressed Antique Brass and Distressed Dark Antique Brass finishes. Please specify your required finish when ordering.
